

Requests to the residents (April 9, 2021)

Kyoto, Tokyo and Okinawa Prefectures will be added to the areas where “pre-emergency measures” should be taken on April 12.

Reflecting the situation, Wakayama Prefectural Government has revised the requests to the residents as below.

Please kindly pay attention to the following points to behave carefully.

- Refraining from eating in a group or going to restaurants/bars where staff entertain customers in areas where infections are particularly widespread
- Refraining from dining and staying together in a group late into the night
- ◇ ◇
- Self-restraint by the elderly in participating in large-scale events such as karaoke or dance parties
- Self-restraint by medical and welfare facilities' staff in having meals with non-family members
- ◇ ◇
- Consulting with a clinic as soon as symptoms are found
- Checking temperature at businesses
- Particular attention to be paid by hospitals and welfare facility services
- ◇ ◇
- Guidelines to prevent the spread of infections for each business
- Compulsory wearing of a mask at workplaces
- Active promotion of teleworking, staggered work hours, etc.
- ◇ ◇
- Further attention to be paid by close contacts even when they tested negative
- Early suspicion of COVID-19 by medical institutions

-
- Refraining from karaoke with non-family members
 - Refraining from non-essential and non-urgent visit to Kyoto, Osaka, Hyogo, Tokyo, Miyagi and Okinawa Prefectures
 - *Period: Until the Novel Coronavirus Headquarters of the national government delist these prefectures from “areas where pre-emergency measures should be taken”
 - Refraining from non-essential and non-urgent visit to Saitama, Chiba and Kanagawa Prefectures
 - *Period: Same as the period of the corresponding requests of these prefectural governments
 - Refraining from parties for welcome, farewell, graduation and flower-viewing as much as possible

<Requests to the residents>

Refraining from eating in a group or going to restaurants/bars where staff entertain customers in areas where infections are particularly widespread

- When you visit other areas where infections are particularly widespread, please implement basic preventive measures (wearing of a mask, washing hands, etc.) and refrain from eating in a group or going to restaurants/bars where staff entertain customers.

Refraining from dining and staying together in a group late into the night

- There were cases of infection among those who had dined together with their friends for a long time late into the night and stayed overnight at their friends' home. Please refrain from such activities.

Self-restraint by the elderly in participating in large-scale events such as karaoke or dance parties

There were cases where the elderly got infected at events such as karaoke. As the elderly tend to develop severe illness by the infection, they are requested to avoid long-lasting close-contact settings with others without wearing a mask and refrain from participating in occasions where proper preventive measures are not taken.

Self-restraint by medical and welfare facilities' staff in having meals with non-family members

There have been many cases of transmissions on group-meal occasions. In particular, those working at medical and welfare facilities need to pay careful attention as they have frequent contact with those with underlying diseases and the elderly who tend to develop severe illness by the infection. In order not to bring the virus into the facilities, related staff are requested to refrain from having meals with someone other than their family members as the risk of infection increases when such an occasion lasts long or involves drinking of alcohol.

Consulting with a clinic as soon as symptoms are found

- There have been many cases where those with symptoms such as fever or weariness went to work and spread infections to people around them. As requested repeatedly, please do not neglect any mild symptoms and consult with your family doctor or nearby medical institution by phone. If you do not have a family doctor and are not sure where to consult, please contact "COVID-19 Call Center" (TEL: 073-441-2170 / FAX: 073-431-1800).

Checking temperature at businesses

- Business operators should check their employees' temperature. If their employees have any symptoms, please stop them from working and take appropriate responses such as encouraging them to go to a clinic, etc.

Particular attention to be paid by hospitals and welfare facility services

- Staff of hospitals and welfare facilities should pay particular attention not to bring infections in their facilities. All staff, including home-visit/day care providers and care managers, should thoroughly implement preventive measures, and self-monitor the health conditions more strictly, such as checking temperature at each facility.

Guidelines to prevent the spread of infections for each business

- Each business operator has been requested to comply with the guidelines to prevent the spread of infections made by the prefectural government and relevant business sectors. While many of the business operators have been following the guidelines, all operators should thoroughly comply with their guidelines and put a poster to prevent the spread of infections.

Compulsory wearing of a mask at workplaces

- A cluster of infections occurred at a workplace and the suspected cause of infections is a conversation without a mask during work. At workplaces, many people share the same space for a long time. Therefore, not only during meetings but also at all times, please thoroughly implement preventive measures such as wearing a mask, disinfecting hands and fingers, sanitizing shared surfaces including door knobs and handles, frequent ventilation, etc.

Active promotion of teleworking, staggered work hours, etc.

- Business operators are requested to actively promote efforts to reduce people-to-people contact, such as teleworking, staggered work hours, bicycle commuting, etc.

Further attention to be paid by close contacts even when they tested negative

- In Wakayama Prefecture, close contacts of those infected are promptly identified and offered PCR tests. Therefore, there have been some cases where the close contacts tested positive in later tests during the two-week quarantine period even when they had tested negative in the first test. The close contacts are requested to stay at home in self-isolation during their quarantine period and avoid contact with other people.

Early suspicion of COVID-19 by medical institutions

- Medical institutions, clinics in particular, are requested to continuously work on early detection of COVID-19 patients by suspecting infection at an earlier stage and performing tests promptly even for those with mild symptoms such as coughing and slight fever.

Refraining from karaoke with non-family members

- There have been some cases where many people were infected after they enjoyed karaoke in groups. In response to these cases, please refrain from singing karaoke with someone other than your family members, such as your friends.

Refraining from non-essential and non-urgent visit to Kyoto, Osaka, Hyogo, Tokyo, Miyagi and Okinawa Prefectures

- While the pre-emergency measures are implemented in Kyoto, Osaka, Hyogo, Tokyo, Miyagi and Okinawa Prefectures, please refrain from non-essential and non-urgent visit to these prefectures. When you need to go to these prefectures, please implement basic preventive measures thoroughly.

Refraining from non-essential and non-urgent visit to Saitama, Chiba and Kanagawa Prefectures

- As the prefectural governments of Saitama, Chiba and Kanagawa are going to ask their residents to continuously refrain from non-essential and non-urgent outings, please correspondingly refrain from non-essential and non-urgent visit to these three prefectures. When you go to these prefectures for business trips, etc., please implement basic preventive measures thoroughly.

Refraining from parties for welcome, farewell, graduation and flower-viewing as much as possible

- Please refrain from parties for welcome, farewell, graduation and flower-viewing as much as possible particularly in this period as opportunities of drinking and eating will increase due to entrance to school/company and job transfer at the end/start of the fiscal year.
