Hello, everyone. Today I will talk about my dream. I want to be a scientist. I like science very much. When I was five, I watched a science program on TV for the first time. In the program, the color of water suddenly changed. I was surprised. After that, I watched many science programs on TV. In one program, a person's voice suddenly became different. It was very interesting, and I wanted to know why his voice became different. So by reading some websites, I learned why the person's voice became different. I was very happy when I learned about that. After that, I became more interested in science.

When I was in junior high school, I read many science books in the city library. I often went to the science museum in our city with my friends.

Now, I will continue to study science in many ways. If I become a scientist in the future, I want to share my ideas with people from many different countries. So I will study English more.
